The economic, political and cultural life in Lithuania has changed dramatically over the last decade. These changes are reflected in publishing – more books are being published each year. In 1990, 2,499 titles were published; in the year 2000, 3,709 titles were published. In part, this increase can be attributed to the increase in the number of publishers. On the other hand, this growth in publishing is also due to the state’s attitude: various ministries, departments, government programmes and foundations are providing support. This is especially important in the publishing of dictionaries, reference books and encyclopedias, whose preparation can take more than a year. The government’s positive attitude toward this genre of literature creates favourable conditions for both publisher and reader.

Fiction is the most published literature in Lithuania, followed by instructional publications and finally scientific literature. Books from these areas have been dominating publishing figures year after year. Dictionaries, encyclopedias and reference books comprise approximately ten percent of all published books. However, it is of note that informational publications are growing in popular appeal: more and more books of this genre are being published. For example, in 2000, a total of 3,709 titles were published, 294 of those were encyclopedias, dictionaries and reference books totalling 620,600 copies.

Lexicography
The year 1620 marks the beginning of the history of lexicography in Lithuania, when in Vilnius, the first tri-lingual (Polish- Latin-Lithuanian) dictionary, prepared by Konstantinas Sirvydas, was published. Later, in the 18th century, dictionary publishing moved from Lithuania into Lithuania Minor with three German-Lithuanian dictionaries printed by Wilhelm Haack, Pilypas Ruigys and Kristijonas Gotlib Milkus.

The most important lexicographic work was begun in the 20th century – the preparation of Lietuvių kalbos žodynas (Dictionary of the Lithuanian Language) with Kazimieras Būga, the most noted Lithuanian linguist, collecting material for it. He prepared the dictionary for press up to the
word anga, and Juozas Balčikonis continued, along with a group of colleagues assembled from all of Lithuania. Exactly 100 years later, in 2002, the final volume of the dictionary, consisting of twenty volumes in all, was published. The dictionary encompasses Lithuanian lexicon from the oldest writings and manuscripts up to and including modern Lithuanian and its various dialects. It is the largest treasure trove of Lithuanian words.

When Lithuania regained its independence, prospects for scholars and publishers improved enormously, and the works of foreign authors became accessible. At the same time it became crucial to organize native terminology in various fields – science, technology, artistic concepts and to find Lithuanian equivalents for new terminology, concepts and things in order to preserve the integrity of the language. Today, there are many dictionaries for the terminology of science, art and technology, which are mostly parallel dictionaries (bilingual, multilingual). There are dictionaries for the fields of botany, chemistry, physics, mathematics, book science, computer science, law, the fine arts, and others. With international borders having opened, the market has grown for Lithuanian bilingual dictionaries with English, Russian, German, Polish, French, Italian, Spanish, Norwegian, Danish, Japanese, and other languages. In the last decades of the 20th century, several dialectic dictionaries have been published: Northeastern Dūnininkai, Lazûnai, Druskininkai, and Zietela. At present, a dictionary of the Zanavykai dialect in 2003 prepared (Vol. II in 2004). And so, over the last few years a wide range of dictionaries have been published in Lithuania – monolingual, bilingual and multilingual, dialectic, common language, terminology, phraseology, synonyms, international words, place names, writing, accentuation, pronunciation, systemic, retrospective, usage frequency, and encyclopaedic. Their variety and quantity is partly represented in this display, which consists of books published between 1997 and 2005.

Encyclopedia Publishing

The first encyclopedia in Lithuania was also published in Vilnius, in 1608, even earlier than Sirvydas’ dictionary. It was Jonas Protasovicius’ Inventores rerum, arba Trupnas aprašymas, kas ką išrado ir žmonėms naudotis atidavė (A Brief Description, a listing of inventions and inventors) in Polish. Later, also in Polish, four volumes (A-C) of Vissutinė enciklopedija, visiems luomams reikalingiausią žinių rinkinys (The Universal Encyclopedia: A Collection of the Most Important Information for all Classes) were published.

At the beginning of the 20th century several attempts were made to prepare an encyclopedia in Lithuanian, but due to various problems such as a lack of finances or editorial misunderstandings, none was successful. In 1929, Spaudos fondas (The Publishing Foundation) sponsored the encyclopedia project conceived by the Cultural Council of Lithuania. Finally, between 1931 and 1933, the first volume – twelve volumes (senior editor Vaclovas Biržiška) of Lietuviškoji enciklopedija (The Lithuanian Encyclopedia) appeared. By 1944 Volume IX and Volume X had been published. Unfortunately, World War II put an end to the project. Lithuanians in the United States continued these efforts, however, and published Lietuvių enciklopedija (37 volumes, 1953-1987).

In Lithuania from 1966 to 1971, Mažoji lietuvių tarybinė enciklopedija (The Minor Lithuanian Soviet Encyclopedia, 1-3 volumes) was published, and from 1976 to 1985 a general encyclopedia, the thirteen-volume Lietuviškoji tarybinė enciklopedija (The Lithuanian Soviet Encyclopedia) was published. Later, between 1985 and 1988 the four-volume Tarybų Lietuvos enciklopedija (The Soviet Lithuanian Encyclopedia) was published.

The question of a universal encyclopedia arose once again when Lithuanian regained independence. It was important to acquaint both Lithuania and the rest of the world with our history, culture and science, which had been distorted or silenced over so many decades. In 1996, preparation began for the twenty-volume Vissutinė lietuvių enciklopedija (The Universal Lithuanian Encyclopedia). It will include approximately 115,000 articles, 24,000 illustrations, and 630 maps. Much space is devoted to the aspects of Lithuanian history that were forbidden or ignored during Soviet occupation: Lithuanian statehood, the history of the Lithuanian Army and Lithuanian Catholic Church, the resistance to the Nazi and Soviet occupations, the Soviet genocide of the Lithuanian nation, Lithuania Minor, and the Lithuanian diaspora. The President of Lithuania, Valdas Adamkus, is the patron of Vissutinė lietuvių enciklopedija. Eight volumes have already been published (Vol. I in 2001 – VIII in 2005).

In presenting almost any field-specific Lithuanian encyclopedia it can be said that it’s the “first” or the “first ever published” because they’ve
only been released over the last several years. Until then, there were hardly any publications of this type. Namò ûkio enciklopedija (“Encyclopedia of Home Economics”), 1987, Medicinos enciklopedija (Encyclopedia of Medicine), vols. I-II, 1991-1993, and Vaiškų enciklopedija (The Children’s Encyclopedia), 1994.

For the first time in Lithuania preparation of an encyclopedia of music, Muzikos enciklopedija, has begun (Vol. I in 2000, Vol II in 2003). Topics include various areas of musical culture worldwide, musical terminology in Italian and other languages and their meanings. Volume I was published in 2000, with three volumes planned in all. Also under way is Technikos enciklopedija (Encyclopedia of Technology) (Vol. I in 2000, Vol II in 2003), which encompasses various fields of technology from construction and food technology to computer sciences and astronauts. Volume I was published in 2000, with four volumes planned.

Also for the first time, Lietuvių kalbos enciklopedija (Encyclopedia of the Lithuanian Language) and Lietuvių literatūros enciklopedija (Encyclopedia of Lithuanian Literature) were published, in 1999 and 2001, respectively. This encyclopedia has been published in a form of a compact disc. Scholars from the Lithuanian Language Institute and the Lithuanian Literature and Folklore Institute wrote the articles and prepared and edited the encyclopedias.

Mažosios Lietuvos enciklopedija (Encyclopedia of Lithuania Minor) has an exceptional place among other encyclopedias. It is the first and only encyclopedia in the world about Lithuania Minor – the territories of Kaliningrad and Klaipėda (Memel) up to 1945. It is an opportunity to preserve the disappearing or already lost the Lietuvininkai and Prussian cultural inheritance, which is priceless not only to Lithuanians or Balts, but to the culture of all of Europe. Mažosios Lietuvos enciklopedija will consist of four volumes (9,000 articles and several thousand illustrations). Volume I was published in 2000 (Vol II in 2003).

*****

Of the many publishers registered in Lithuania only some publish books. Of those, even fewer publish dictionaries, encyclopedias, and reference books. Among this group, several publishers are noteworthy – Mokslo ir enciklopedijų leidybos institutas (Science and Encyclopedia Publishing Institute), Lietuvių kalbos institutas (Institute of Lithuanian Language), Lietuvių literatūros ir tautosakos institutas (Institute of Lithuanian Literature and Folklore), Alma Littera, Žodynas, Šviesa and Baltos Lankos. The Technologija Publishers of Kaunas Technical University, the Institute of Mathematics and Informatics (together with the Institute of Lithuanian Language), Alma Littera, TEV and VTEX have all published computer dictionaries.

Virginija Bogušienė
XV–XVI a. Lietuvos lotyniškų knygų sąrašas / Index
librorum latinorum Lituaniae saeculi quinti decimi et sexti decimi

The List of the 15th–16th Century Latin Books of Lithuania
Compiled by D. Narbutienė and S. Narbutas
In Lithuanian
Introduction in Lithuanian, English, Polish and Russian

The List includes 374 descriptions of the Latin Books printed between 1494 and 1600 both in the Grand Duchy of Lithuania and abroad. The authors of these books were the citizens of Lithuania or persons from abroad, who worked for the Grand Dukes, for high officials of the state or Lithuanian Church a. o. Data about the contents of the books, the main typographical references and modern preserving places are also given. This List follows up with the introduction about the book culture of the Grand Duchy, opened by The List of the 17th Century Latin Books of Lithuania at 1998.

Lietuvių tarmės / Lithuanian Dialects

A Computer Dictionary
Part 1: 2000, 1 CD-ROM
ISBN 9986-668-19-0 (General)

This is the first computerized dictionary of Lithuanian dialects, exceptional in that users need not know the language or its dialects, thanks to the multimedia applications employed here. Pictorial icons guide the user in finding the pronunciation of the words in various dialects. Included in the dictionary are words for 120 objects used in everyday life. The user can hear these words pronounced in various dialects and see maps of how their usage has spread. The user can also hear the words used in various expressions and read descriptive explanations in both Lithuanian and English. The dictionary was sponsored by UNESCO. An international jury of experts selected this dictionary as an exhibit in the Pavilion of Knowledge at the EXPO 2000 in Hanover where it won the EXPO 2000 medal for inventive use of information technology in the humanities.

The Dictionary of Place Names

Compilation by A. Pupkis and M. Razmukaitė
Edited by A. Pupkis

The Dictionary of Place Names is designed for those users of the standard language such as journalists, editors, teachers and local government employees. The authors and publishers of various tourist plans, maps and guides, road specialists who make traffic signs and all those who encounter the standard use of place names will find it useful.

ISBN 5-420-01497-1
Where We Come from

Every nation, like every person, has its own history – unique and never to be repeated. Some nations rise and flourish; others withdraw or are pushed from the processes of history. The origin and past of some nations can be reconstructed on the basis of their abundant heritage of material and spiritual culture, while others leave researchers only meager vestiges of their life.

What is the origin of the Lithuanians, a people living on the eastern shore of the Baltic Sea? Of numerous Baltic tribes, they and the Latvians alone survived. How did they live hundreds or even thousands of years ago? What did they adopt from their neighbors, and what did they transmit to them?

Using the findings of linguistics, archaeology, and anthropology, three of Lithuania’s most eminent scholars – Zigmas Zinkevičius, Aleksiejus Luchtanas, and Gintautas Ėsnys – answer these questions in a book for the general reader.

ISBN 5-420-01572-2

Lietuva. Šeimos enciklopedija

It is an encyclopaedic popular science book with plenty of illustrations. It consists of separate thematic parts concerning the development of land, different scientific fields, Lithuanian art, literature, theatre and history. A thematic list of literature with more information about some items is presented for the readers. It also contains an index and references connecting separate repeated subjects or motives.

David W. Pearce

Aiškinamasis ekonomikos anglų–lietuvių kalbų žodynas.

Pearce, David W. (compiler). [Translation from the English language; Editor of translation H. Pragarauskas]
The Explanatory English-Lithuanian Dictionary of Economics

The Dictionary of Modern Economics compiled by the famous English economist David W. Pearce (1941–2005) covering nearly 3,000 terms. All main concepts of economics are collected there, comprehensively explained and translated into the Lithuanian language. Nearly every article contains references to other articles, with the help of which the reader will be able to form a full picture of a certain sphere of economics. The index of Lithuanian-English terms, as well as the index of the names mentioned in the dictionary will help one to use the dictionary. The tables presented at the end of the dictionary will allow the user to compare economic indicators of the most developed countries with those of Lithuania.

ISBN 9955-680-28-8
Visuotinė lietuvių enciklopedija

The Universal Lithuanian Encyclopedia

Editorial board: Chairman J. Tumelis... (et al.)

This is the first post-Soviet authentic scientific and informative publication covering a large volume of basic knowledge of the world as well as of Lithuania and Lithuanians. The encyclopedia is planned in twenty volumes, approximately 800 pages each. Colour illustrations and maps will add a lively touch to 115,000 entries. Twenty per cent of the material is devoted exclusively to Lithuanian topics. Subjects that have been banned or ignored during the Soviet period will account for a large part of the encyclopedia. They include Lithuania’s statehood; the history of the Grand Duchy of Lithuania; the history of the Catholic Church and Lithuania’s military forces; the anti-Nazi and Resistance movements.

Mažosios Lietuvos enciklopedija

Encyclopedia of Lithuania Minor

Volume 1 of the Encyclopedia Minor has been published by joint efforts of the World Foundation of Lithuania Minor (Canada, USA) and the Science and Encyclopedia Publishing Institute (Lithuania). It is the first encyclopedia on Lithuania Minor, a historical region that has existed up to 1945, namely – Kaušanianus (Königsberg) and Klaipėda (Memel) districts. The significance of the encyclopedia lays in the possibility to perpetuate and preserve the decaying or already lost cultural heritage of the population, the Lithuanians (lietuvininkai) and Prussians. That seems to be the greatest values not only in the Lithuanian or Baltic cultural context, but in the wide European context, too.

Jevgenija Biber, Rocha Kostanian

“Vilniaus geto afišos” (katalogas-zinynas)

Posters of Vilnius Ghetto
(Catalogue-Reference Book).

The album-catalogue of the posters of Vilnius Ghetto compiled by the researchers of the Vilna Gaon Jewish State Museum Jevgenija Biber, Rochos Kostanian and Judita Rozina acquaints the readers with the cultural life of the Jews: a moral response to violence and massive destruction of the nation at Vilnius Ghetto. The posters speak for themselves. The album-catalogue presents a comprehensive summary list of posters of Vilnius Ghetto stored in the Lithuanian Central State Archives and the Vilna Gaon Jewish State Museum. The section People from Posters tells us about the activities and fates of the people who participated in the cultural life of the Ghetto.

ISBN 9955-23-058-4

Pasaulio vietvardžiai. Europa

Place Names of the World. Europe

This is the first dictionary of place names of the world of this type published in Lithuania. It is dedicated to making uniform use of place names, i.e. proper names of places, of other countries (excluding Lithuania) in the Lithuanian language, especially their writing.

The first volume of the dictionary is Place Names of the World. Europe presents about 40,000 place names from 44 countries (except Lithuania) with nearly 54,000 various references (from synonyms, authentic forms and their romanisation). The volume consists of dictionary articles and the indices of authentic forms (Latin, Cyrillic and Greek).

It is compiled on the basis of the Index of Proper Names of the Universal Lithuanian Encyclopaedia and the World Atlas the Times Comprehensive Atlas of the World published in London in 2001. Place names for the dictionary are selected from these publications.

ISBN 5-450-01598-6
Chemijos terminų aškinamasis žodynas

Kazys Kuzavinis, Bronys Savukynas

The dictionary contains more than 14,000 Lithuanian terms (most of them are explained), their synonyms, chemical compounds and systematic names. Equivalents of the terms in the Russian and English languages are also provided. All the terms are numbered; the letter of the Russian and English equivalents and the number of the term are indicated in the indexes alongside the systematic (IUPAC) names.

Terminology of inorganic chemistry is specifically updated and supplemented in the new edition. Many new terms from the following spheres of science and industry, which are closely related to chemistry, are included: biochemistry, chemical technology, chemical engineering, environmental protection, physics, mineralogy and others.

Lietuvių vardų kilmės žodynas

Dictionary of the Origin of Lithuanian Names

Lithuanian names are of various origin: Lithuanian, Prussian, Latvian, Latin, Greek, Germanic, and Slavonic. Everyone is eager to know the origin of his/her name, the meaning that one or another word had before it became a name. The authors of the Dictionary of the Origin of Lithuanian Names made an attempt to provide answers to these questions. The fifth edition of the dictionary is amended and supplemented with Lithuanian names – the oldest personal names from historical sources. In explaining the origin of names common and proper words from which they had derived are provided and the linguistically established former meaning of these words is specified. Hence, the names can be chosen according to the etymological meaning acceptable to the reader.

Didysis vokiečių - lietuvių k. žodynas 1-2 t. (kompl.)

Juozas Kržinauskas, Stasys Smagurauskas

Main vocabulary, various scientific and technical terms of the contemporary German language used in popular science literature and periodical press are presented in this dictionary. The user will find a lot of phraseological units, proverbs and sayings, words used in the spoken language, as well as obsolete words, dialectisms found in the works of writers writing in the German language; neologisms encountered in present day publications and periodicals. The illustrative examples presented will help understand the meanings and usage of the words better. The dictionary will be great help in reading fiction, social and political journalism, as well as scientific literature.

ISBN 5-420-01592-7
This dictionary is the first attempt to put together and systematise Lithuanian terms, which are in one or another way related to measurements. The dictionary not only presents Lithuanian terms relating to measurements and experiments (7,790 terms) and their brief definitions but also provides equivalents of these terms in the English, French, German and Russian languages. The dictionary consists of an alphabetical explanatory vocabulary of the Lithuanian terms and four indexes of the equivalents of these terms in four languages (English, French, German and Russian). Abbreviations most often used in metrology, SI units of measurement and recommendations for their use, quantities and symbols of the units of their measurements, values of main constants, non-metric units of measurements used in the USA and Great Britain, non-metric units of measurement used in Lithuania are presented in annexes.

ISBN 5-420-01568-4

Literatūros žinynas V–XII klasei

The reference book presents accented literary concepts and terms used in the textbooks for V–XII forms. In case the term has several meanings, one or two most important meanings are presented so that the pupils could use the adequate concepts more accurately and recognise them in any context. Several terms from other fields of science are also included: they are concepts and terms of history, philosophy, ethnology, psychology, mythology, bibliography that are closely related to literature. Names of Antiquity and the Bible, tables of the development of writing and literature, folklore genres, literary relations, genres and means of expression are presented separately.

ISBN 5-430-04033-9

JUOZAS KRIŽINAUSKAS

Lietuvių–vokiečių kalbų žodynas

It is not only the largest but is said to be the best Lithuanian–German dictionary that has ever been published in Lithuania. It abounds not only in literary but also in spoken words, terms from the sphere of computer technology, mathematics, biology and others, phraseological units, vivid examples and word combinations. Lithuanian words and their German equivalents are stressed and main forms of the Lithuanian and irregularly inflected German verbs are presented. The Dictionary has been compiled following the new orthography of the German language. The number of entries totals around 35,000 words and sayings.

ISBN 9955-481-59-0
